Scoring instructions for the physical therapists:

Section 1 - Pain intensity

- I have no pain at the moment. *(A check at this level is scored as 0)*
- The pain is very mild at the moment. *(A check at this level is scored as 1)*
- The pain is moderate at the moment. *(A check at this level is scored as 2)*
- The pain is fairly severe at the moment. *(A check at this level is scored as 3)*
- The pain is very severe at the moment. *(A check at this level is scored as 4)*
- The pain is the worst imaginable at the moment. *(A check at this level is scored as 5)*

If an item in each section is filled out, add up the score from each section and double it to get the final percentage score (eg. If total points from all 10 sections was 20, double the points and the final score would be 40. This is the score you report.)

If all items are not scored, then add up the total from all of the sections that were filled out, then divide by the total number of available points (i.e. if only 8 sections were answered, then the total possible points would be 40, not 50) (eg. If total points from 8 sections was 16, then calculate: $16/40 \times 100 = 40$. This is the score you report)
